October 26, 2021

Greg Wolf, Director Producer Relation Management
Shane Grant, Executive Vice President & CEO
Danone North America
1 Maple Ave
White Plains, NY 10605

Dear Mr. Wolf and Mr. Grant,

Maine, New Hampshire, Vermont, and New York together represent 846 certified organic family dairy farms. These family farms are significant contributors to the Northeast rural economies, and studies have shown that organic dairy farms' contributions to our local economic development surpass the local economic contributions from conventional dairy farms.[1] Our dairy farmers depend on stable markets, and Danone's exit from the Northeast means that over 10 percent of the region's organic dairy farms will be left without a market. These 89 farm families have helped build the Horizon Organic Milk brand for decades in the region. 15,234 farmers, organic consumers, advocates, and organizations have signed a national petition (13,020 signatures) and Maine-specific petition (2,214 signatures) calling for Danone to find a way to stay in the Northeast and continue to build our regional organic dairy market locally. Please see the enclosed petitions.

Together, we request that you meet with the affected state organic farm producer organizations, NOFA-NY, NOFA-VT, MOFGA, and NODPA to discuss the impact of Horizon's decision to end these contracts and identify a better resolution for these dairy farm families. In this meeting, we would like to discuss options for Danone to stay in the Northeast, extending contracts with the 89 producers to eighteen months, and retirement payments for those farms who have chosen to leave organic dairy because of your exit from the region. We would like to meet with you no later than November 5. Please contact Sarah Alexander, Executive Director of MOFGA (salexander@mofga.org; 207-568-4142) to schedule this important opportunity to continue Danone North America's commitment to family dairy farms, rural communities, and meet your social mission commitments as a B Corporation.

Sincerely,

Nicole Dehne, Certification Director, Northeast Organic Farmers Association of Vermont
Bethany Wallis, Executive Director, Northeast Organic Farmers Association of New York, Inc.
Sarah Alexander, Executive Director, Maine Organic Farmers and Gardeners Association
Ed Maltby, Executive Director, Northeast Organic Dairy Producers Alliance
Jill Smith, Executive Director, Western Organic Dairy Producers Alliance
Kate Mendenhall, Executive Director, Organic Farmers Association
Abby Youngblood, Executive Director, National Organic Coalition
Melody Morrell, Executive Director, Cornucopia Institute
Dave Chapman, Co-Director & Founder, Real Organic Project

---

October 26, 2021

To: Greg Wolf, Director Producer Relation Mgmt and Shane Grant, Exec. Vice Pres. & CEO, Danone North America

From: Organic Farmers Association, National Organic Coalition, Northeast Organic Dairy Producers Alliance, Northeast Organic Farming Association of New York, Northeast Organic Farming Association of Vermont, Maine Organic Farmers & Gardeners Association, Real Organic Project, Cornucopia, Western Organic Dairy Producers Alliance

Dear Mr. Wolf and Mr. Grant,

As a certified B Corporation, Danone claims to "use profits and growth as a means to a greater end: positive impact for their employees, communities, and the environment."

But your business decision to terminate organic milk contracts with a large number of Northeast organic dairies flies in the face of what you say you stand for. It is especially duplicitous as you continue to buy milk from "organic" Concentrated Animal Feeding Operations (CAFOs) that contribute to the organic milk glut, undermine the integrity of the organic label, and drive pay prices below the cost of milk production for the majority of organic dairy farms.

The organic farm families you are ending contracts with help to sustain local veterinarians, feed and farm suppliers, schools, hospitals, tax base, and downtown businesses. This mass termination will have a profound and negative impact on local economies, community resilience, and the local environment. We ask that Danone North America take the following steps to protect the farm families and local communities that rely on these contractual relationships for their survival:

1. Reconsider exiting from ME, VT, NH, and NY. Fluid milk production is important to the food security of the Northeast, and already the region's demand far outweighs its supply. Many of these family dairy farms have been with Horizon for decades. Danone's mission and B Corp certification necessitate a solution where Danone can be both efficient and respectful of the farm families that helped to build the Horizon brand. Danone has worked in France with regional milk-pooling stations and other innovative solutions that could lead to new methods for local food systems in the U.S. Danone has invested millions into other Northeast plant-based milk facilities in the past few years and we ask that you also invest in the farm families that have given your company so much over the years. Come to the table to find a solution that allows you to stay.

2. Extend the date of the contract termination to 18 months (rather than the 12 months currently offered). As each individual farm family works on plans for their future, they need more lead time to find other markets, seek debt relief, or otherwise plan a transition that works for them.

3. Offer a contract severance package or contract retirement package bonus to the affected Northeast dairies in recognition of their long-time relationship with the company and their willingness to commit to the capital-intensive production of high-quality organic milk that established the reputation of Horizon Organic. Each organic farm will suffer the loss of planned income, and each will have expenses outside their normal personal and business budgets because of Danone's actions.

Any offers should ensure that the Northeast organic dairy farm families are compensated for the loss of their market at a time when there are no alternative organic milk contracts and the life-changing decisions they will be thrust into by the termination of long-term contracts. Danone, a B corporation, has stated its commitment to supporting the next generations of farmers–offering these resources is essential to supporting the next generation of farmers and their communities.

Sincerely,

1. Katherine Mendenhall, Organic Farmers Association, Spirit Lake, IA (2021-09-14 15:48:32 EST)

To: Greg Wolf, Director Producer Relation Management and Shane Grant, Executive Vice President & CEO

Dear Mr. Wolf and Mr. Grant,

We, the undersigned 2,214 farmers, consumers and business owners would like to share that your business decision to terminate organic milk contracts with a large number of Northeast organic dairies flies in the face of what you say you stand for. It is especially duplicitous as you continue to buy milk from "organic" Concentrated Animal Feeding Operations (CAFOs) that contribute to the organic milk glut, undermine the integrity of the organic label, and drive pay prices below the cost of milk production for the majority of organic dairy farms.

In Maine, many of the 14 dairy farms impacted by Danone's decision have been dedicated producers for Horizon for years. Horizon has grown its business and share of the organic market in Maine due to the efforts of our producers.

The organic farm families you are ending contracts with help to sustain local veterinarians, feed and farm suppliers, schools, hospitals, tax base, and downtown businesses. This mass termination will have a profound and negative impact on local economies, community resilience, and the local environment.

We ask that Danone North America take the following steps to protect the farm families and local communities that rely on these contractual relationships for their survival:

1. Reconsider exiting from ME, VT, NH, and NY. Fluid milk production is important to the food security of the Northeast, and already the region's demand far outweighs its supply. Danone has invested millions into other Northeast plant-based milk facilities in the past few years and we ask that you also invest in the farm families that have given your company so much over the years. Come to the table to find a solution that allows you to stay.

2. Extend the date of the contract termination to 18 months (rather than the 12 months currently offered). As each individual farm family works on plans for their future, they need more lead time to find other markets, seek debt relief, or otherwise plan a transition that works for them.

3. Offer a contract severance package or contract retirement package bonus to the affected Northeast dairies in recognition of their long-time relationship with the company and their willingness to commit to the capital-intensive production of high-quality organic milk that established the reputation of Horizon Organic. Each organic farm will suffer the loss of planned income, and each will have expenses outside their normal personal and business budgets because of Danone's actions.

4. Make a substantial monetary donation to the Northeast Dairy Business Innovation Center to support farms across the region impacted by Danone's decision, so they can obtain grants for

business planning, explore new markets, and/or access funds for potential infrastructure to meet new market opportunities.

5. Make a substantial leading pledge to the nascent company in Maine that will soon be launching a fundraising phase to stand up in-state organic dairy processing.

6. Commit to paying our producers their premium payments in this final year contract and make that intention explicit in the new contracts; likewise, compensate farmers for premium payments that have not received in their most recent contract.

Danone's decision to let go of 89 farms across the Northeast is not only going to be a direct financial and emotional loss for those producers, but also a huge loss for American agriculture and the myriad benefits that dairy farms bring to rural communities and the food economy.

Sincerely,
